

The greatest invention since the wheel.

- **Rhino** leads the industry with economical one-piece immobilizers which are the quickest and easiest to install, lightest in weight and more durable and versatile than their competitors'. Many features are patented, which make the design and performance advantages uniquely Rhino's.
- **Rhino** offers a unified design system in manufacturing, a commonality of parts and component interchangeability incorporated throughout the product line.
- **Rhino's** product specifications and higher performance statistics speak for themselves.
- **Rhino** has built and sold immobilizers since 1958, holding and originating more immobilizer technology patents than any of its competitors.
- **Rhino** uses durable safety orange, non-toxic, non-hazardous powder coating for high visibility and superior rust protection.
- **Rhino** enjoys 45 years of proven customer satisfaction.
